Azure Assessment Migrate & Modernize

Ready to accelerate your cloud journey with Azure?

Interlink's *Azure Assessment* helps organizations understand how to migrate and modernize their applications, infrastructure, and data workloads - unlocking scalability, operational velocity, and AI readiness.

Our expert team conducts a full-spectrum analysis of your IT environment, including physical and virtual infrastructure, current deployments, usage patterns, and business processes.

Why go to Azure?

- Exit costly or aging data centers
- Avoiding expensive hardware refresh cycles
- Colocation renewals
- End-of-support for critical platforms:
    - Exchange
    - SQL Server
- Currently on VMware
- Looking to modernize and scale

Value of an Assessment

Deep Analysis
End-to-end mapping of your IT landscape

Tool-Based Assessment
Using Azure Migrate

Actionable Insights
Clear recommendations aligned with Microsoft best practices.

Problems Our Engagement Solves

- **Unclear Migration Path:** We provide a structured roadmap tailored to your business goals.

- **Legacy Infrastructure Challenges:** Identify modernization opportunities and reduce technical debt.

- **AI Readiness Gaps:** Ensure your environment is optimized for future AI workloads.

What to Expect from Interlink's Azure Assessment

Phase 1 – Discovery & Planning
- Conduct workshops to understand your business and IT goals
- Review current infrastructure (physical & virtual), deployments, usage, and data workflows

Phase 2 – Assessment & Mapping
- Use Azure Migrate to analyze workloads
- Generate a tailored assessment report
- Map modernization opportunities and identify blockers

Phase 3 – Recommendations & Enablement
- Deliver a deployment plan and estimated pricing
- Align recommendations with Microsoft's Cloud Adoption Framework
- Optional support for proof-of-concept or pilot deployment

At the end of the engagement, you'll have:

☑ Azure Migrate Report   ☑ Deployment Plan   ☑ Estimated Pricing

Why Interlink Cloud Advisors?

- Azure experts - We guide clients through Azure with deep expertise and a proven track record

- Alignment with Microsoft best practices – Our solutions follow Microsoft's trusted frameworks.

- Streamlined approach for fast, effective POC - We deliver quick, low-friction proof-of-concepts that validate value early.

- Scalability - Our Azure solutions are built to grow with your business.
