

ENDPOINT MANAGEMENT WORKSHOP

Manage and protect your devices, apps & users

Interlink Energize Endpoint Management Workshop

Are you wasting time and effort managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

Enabling users to be productive, on any device, without compromising IT security can be challenging and time consuming - see how Interlink can help utilize Microsoft tools.

Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities."

Forrester 2020 Microsoft 365 Enterprise
Total Economic Impact Study

ENABLE USERS TO BE PRODUCTIVE, ON ANY DEVICE, WITHOUT COMPROMISING IT SECURITY

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that

**70 million smartphones
are lost every year.**

With users asking for more ways to work the way that they want,

Interlink's Endpoint Management Workshop will show you how to manage both company-owned and user-chosen devices in the Cloud. Our team will also discuss best practices around IT policies, leverage zero-touch provisioning, intelligent security, risk-based controls, and integration points into the Microsoft products you already use.

Objectives of the workshop include:

WORKSHOP HIGHLIGHTS

Learn

how to improve your management capabilities with Microsoft Endpoint Manager. Automate processes and enable your users in less time.

Further Secure

your users' identities with multi-factor authentication and conditional access from any modern device

Discover and Protect

your endpoints by enforcing policies and deploying security tools

Enable

your users to be productive with the applications they need, on the devices they want. Manage your environment remotely and take advantage of zero-touch provisioning to save time and money.

- ✓ Improve your security posture with Microsoft Endpoint Manager
- ✓ Learn how to build management policies that protect your users, company data, and devices
- ✓ Gain insights about your users' endpoints and their compliance with your IT policies
- ✓ Determine the best way to give your users access to the apps they need on the devices of their choosing

How Interlink Will Help

Interlink's team of Microsoft Certified consultants will show you the best ways to manage endpoints at the enterprise level. You'll also learn how your organization can protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

Your workshop will be based on your organization's specific business and industry-based needs
