# FRONTLINE WORKER SECURITY WORKSHOP

Protecting the Identities and Access of Your Customer and Production Facing Team Members

ENABLE YOUR FRONTLINE WORKERS SECURELY

Microsoft understands that most organizations have a variety of user types. Frequently we find a mixture of knowledge workers who spend all day on their PC and Frontline workers. These frontline workers spend most of their day on the production floor, servicing customers on a retail floor, or answering calls in a call center. They are enabled by technology, but most organizations are still just scratching the surface of how technology can propel these workers. Organizations can also hesitate to deploy new technology for fear that they are just adding more attack vectors for hackers. This workshop will strengthen your organization licensing and security posture regarding frontline workers, ultimately reducing risk and saving money.

WORKSHOP OBJECTIVES

▶ **Gain Visibility**

Evaluate ROI of the Microsoft security platform for your specific business environment.

▶ **Empowerment**

Better empower frontline workers with technology without increasing security risks.

▶ **Reduce Risk**

Get recommendations on the most cost-effective ways to improve your organization's security.

▶ **Increase Knowledge**

Explore and better under Microsoft security tools and licensing packages for frontline workers.

▶ **Save Money**

Optimize your organization's security investment by learning how to leverage the low-cost Microsoft F1 / F3 plans to license your frontline workers.
