

MERGERS & ACQUISITIONS STRATEGY

Use Cloud technology to save both time and money by helping your merger & acquisition run smoothly and optimize business operations.

Mergers and Acquisitions (M&A) are messy.

After a merger or acquisition, there is a need to quickly identify IT goals, develop an integration plan, and combine the data of the separate entities. Organizations also need to identify how to build value through IT today while simultaneously planning to meet the goals of tomorrow.

INTERLINK CAN HELP YOU AVOID IT PITFALLS BY:

Making sure you don't make common, but costly, IT mistakes.

Building an infrastructure that is ready to handle future mergers or acquisitions.

Creating a Microsoft Cloud environment that can scale on demand.

Boosting productivity, collaboration, and sharing through Office 365.

Identifying how IT can streamline, simplify, and automate business processes.

INTERLINK'S CLOUD M&A STRATEGY

Our M&A strategy identifies the optimal Cloud solutions for integrating the IT infrastructure, processes, and environment of both entities. Our tested Cloud integration and migration strategies are based on a few key principles:

- ✓ Sustainability & growth
- ✓ Streamlining & simplifying IT operations
- ✓ Efficient information sharing
- ✓ No disruptions
- ✓ Subscriptions-based IT solutions
- ✓ Build for future challenges & opportunities

The Six Phases

Interlink uses six successive phases to integrate, standardize, and deploy your Cloud computing-based IT operations — saving your organization both time and money.

How can Interlink help?

Using Microsoft Cloud-based technologies, Interlink has combined the infrastructures of hundreds of firms, post-merger. We can walk you through your integration scenarios and discuss the pros and cons while utilizing our expertise and experience.

Interlink's expertise includes:

► Licensing

We save your organization money by knowing how to structure your agreement to be able to take advantage of redundancies when two companies combine.

► Training

We can put together quick start training packages to get users up and running on new technology quickly.

► Consulting

We provide IT standards consulting to assist with leveraging buying power and creating standards for the business.

► Compliance

We assist with new compliance requirements resulting from M&A which ultimately reduces your risk.

► Access & Control

We provide administrative access management/role-based access control which increases security.

► Migrations & Integrations

We offer Office 365 tenant-to-tenant migrations, hybrid integration, and migrations.

► Global Integrations

We can consolidate across systems that sit anywhere in the world.

► Documentation

We review your new environment and collect the data necessary for a full integration.

► Archiving

We can provide archive consolidation for legal, compliance, and data retention reasons.
