Mitigate Compliance & Privacy Risk Workshops

Intelligently Identify Insider Risks.

Address Compliance Risks Head On

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk.

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist. This workshop gives you the insight you need to better discover, protect, and govern your corporate data.

Data Risk Check Uncovers Data That Can Cause A Compliance Risk

Data Risk Check is the core activity of the Compliance Workshop Data Risk Management. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and surface compliance risks in organizational data. Data Risk Check leverages automated Microsoft 365 tools and services to discover data stored in the Microsoft Cloud and identify potential problem areas.
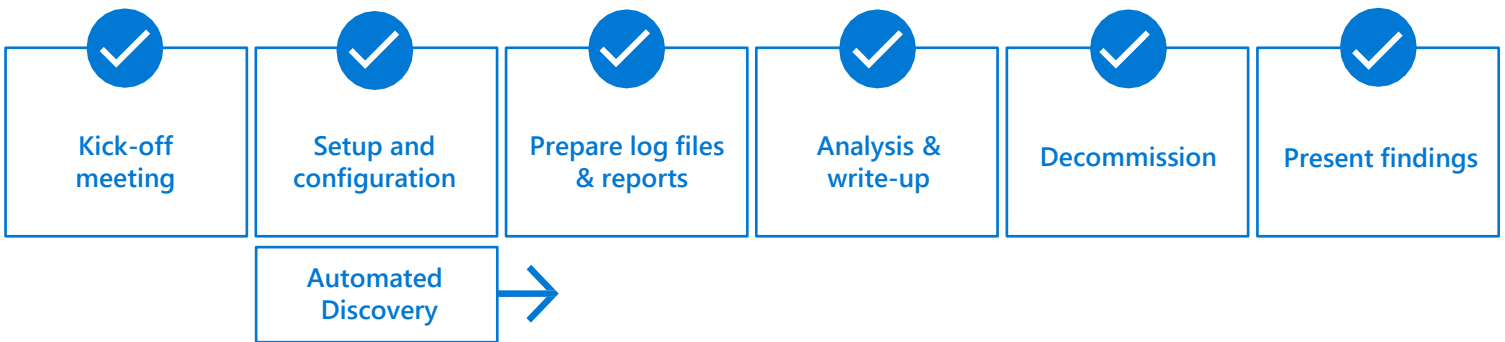

The automated discovery process will analyze existing data for sensitive information and intellectual property, unused or "stale" data, and riskful or suspicious activities.

☑ **Understand** hidden compliance risks of dark data

☑ **Assess** your dark data risks with Data Risk Check

☑ **Assess** environment against the Data Protection Baseline

☑ **Receive** an analysis & report on finds and associated risks

☑ **Learn** about tools and services that mitigate risk

☑ **Explore** recommendations and next steps

By Attending This Workshop, Our Experts Will Work With You To:

1 Document — Document compliance objectives & strategy including compliant Teams deployment and use

2 Understand — Show how to understand, mitigate, & protect against potential compliance risks from dark data

3 Demonstrate — Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies

4 Roadmap — Provide actionable next steps based on your needs and objectives

Compliance Workshop: Data Risk Management

Data Risk Check	Data Protection Baseline Assessment	Discovery Session	Microsoft Compliance Overview	Recommendations and Next Steps

Kick-off meeting	Setup and configuration	Prepare log files & reports	Analysis & write-up	Decommission	Present findings

Automated Discovery →

What to Expect:

By the end of this workshop, experts in Microsoft compliance will provide you with a:

- Data Risk Check report that includes findings and insights from the automated discovery process
- A list of recommendations and actionable next steps that will help mitigate the identified compliance risks
- Detailed assessment of your strategic objectives, influences, and priorities for compliance
- Clear look into Microsoft's approach to compliance and how it relates to your organization
- Data Protection Baseline assessment report with suggestions and top key improvement actions.
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to compliance is more important than ever.

93% of corporate data is "dark" – it's not classified, protected or governed.[1]
