PRODUCTION WORKER SECURITY WORKSHOP

Protecting the identities and access of your production and customer facing team members

Digitally empowered production workers are the future of successful manufacturers. These production workers are experiencing the same digital transformation that the manufacturing industry is undergoing. Organizations must digitally transform to evolve. Yet, if security measures are not considered, companies are at risk. Properly licensing and ensuring an established security posture for your workers is essential to reducing risk, saving money, and transforming your modern workforce.

Securely Transform Your Workforce

Production workers typically make up most of the manufacturing workforce, and it's their efforts that translate strategies into action, maintain business operations, and create happy customers. They use a wealth of knowledge—both institutional knowledge of the company and first-hand insights—to provide essential services.

INTERLINK'S PRODUCTION WORKER SECURITY WORKSHOP CAN HELP YOUR ORGANIZATION:

Recruit, reskill, and retain your next-generation workforce

Equip your production workers with the skills and tools to safely keep up with the new complexities and speed of digital manufacturing reducing risk for your environment.

Boost productivity across the value chain

Augment employees with Microsoft's security offerings specifically built for production workers.

Securely keep pace

Utilize increased operational, maintenance, and process complexity through a technologically empowered workforce.

95% of manufacturing leaders agree that digital transformation is essential to their company's future success.

FICTIV, "2021 State of Manufacturing Report"

EMPOWER YOUR MANUFACTURING PRODUCTION WORKERS

- ▶ Minimize costs and reduce risks associated with the challenge of connecting employees and their devices security to core business systems.
- ▶ Foster culture and community within the workplace by giving more decision-making power to the production workers through visibility into strategic company goals.
- ▶ Digitize business operations between production floor and operations, no more paper needed, all in the Cloud with Microsoft 365.
- ▶ Deliver real-time expertise to key players through live access to business data and processes on mobile phones and tablets—giving the production worker's toolset the same power as the home office.

WORKSHOP OBJECTIVES

▶ Gain Visibility

Evaluate ROI of the Microsoft security platform for your specific business environment.

▶ Reduce Risk

Get recommendations on the most cost-effective ways to improve your organization's security.

▶ Increase knowledge

Explore and better understand Microsoft security tools and licensing packages for production workers.

▶ Save Money

Optimize your organization's security investment by learning how to leverage the low-cost Microsoft F1/F3 plans to license your production workers.

WITH THIS ENGAGEMENT, INTERLINK WILL:

Profile

- ▶ Profile technology needs, connectivity, and infrastructure in use by production workers today.
- ▶ Profile upcoming technology changes that will impact production workers.

Discuss

- ▶ Discuss how frontline worker's technology is currently part of the overall security plan for the future
- ▶ Discuss training/readiness and reinforcement of security concepts for workers

Review

- ▶ Review business requirements for your organization, including regulatory, ISO, and customer requirements
- ▶ Review Microsoft offerings for security that are specifically built for production workers:
 - » Microsoft F1 / F3 Plans
 - » Add on for security and compliance

HOW CAN INTERLINK HELP?

Interlink's team of expert Microsoft certified consultants will evaluate your organization's environment and deliver findings and recommendations to improve your security posture and optimize production workers—ultimately mitigating risk and saving money.
