

Secure Multi-Cloud Environments Workshop

Get a customized threat & vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system.

Do you have a good understanding of security vulnerabilities in your hybrid and multi-cloud environment including VMs, databases, Azure storage and more? Are you aware of the number of suspected authentication activities across your multi-cloud environment? In short, are you confident about the cloud security posture of your organization?

IMPROVE YOUR CLOUD SECURITY POSTURE

Organizations today have increased usage of cloud services to manage a growing volume of data while dealing with tight budgets and vulnerable legacy systems. As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Secure Multi-Cloud Environments Workshop.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

How Interlink Can Help

Interlink's team of expert Microsoft certified consultants will evaluate your organization's environment and deliver findings and recommendations to identify potential threats — ultimately mitigating risk and saving money. **Contact us today** to learn more!

ENGAGEMENT FUNDED BY
MICROSOFT!

WITH THIS ENGAGEMENT, INTERLINK WILL PROVIDE:

WHY YOU SHOULD ATTEND:

- Identify current, ongoing risks to your Cloud environment
- Walk away with actionable next steps based on your specific needs and objectives
- Document your security priorities and needs for the benefit of key stakeholders
- Better understand how to accelerate your security journey using the latest tools

WORKSHOP HIGHLIGHTS:

Given the volume and complexity of identities, data, apps, endpoints, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

- Discover threats and vulnerabilities in your hybrid environment
- Learn how to prioritize and mitigate potential threats to your servers and services.
- Understand what can be done to reduce the attack surface area for hybrid workloads.
- Learn about benefits and capabilities of Defender for Cloud and Azure Network Security.
- Develop defined next steps based on your needs and objectives.

WHAT TO EXPECT:

During this workshop, we'll partner with you to strengthen your organization's approach to hybrid Cloud security. We'll help you better understand how to prioritize and mitigate potential attacks:

- **Analyze** your requirements and priorities for a hybrid cloud security detection and response solution.
- **Define** Scope & deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services.
- **Explore** Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- **Discover** existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- **Recommend** next steps on proceeding with a production deployment of Defender for Cloud and Azure Network Security.
