

# SECURITY WORKSHOP

An immersive experience that brings the Microsoft security vision and capabilities to life.

**Are you looking to assess your security landscape and address demanding security goals and challenges?**

Interlink's Security Workshop was designed to help you and your organization understand how Microsoft's security capabilities can harden your security posture while providing insight on active threats across on-premises and cloud workloads.

## WORKSHOP OBJECTIVES

### ► Discover Threats

Gain visibility into threats to your Microsoft 365 cloud environment across email, identity, and data to better understand, prioritize, and mitigate potential vectors of cyberattacks against your organization.

### ► Understand How to Mitigate Threats

Understand how Microsoft 365 security products can help mitigate and protect against the threats found during the period of this engagement.

### ► Define Security Strategy

Receive an overview security strategy for your security teams and stakeholders.

### ► Accelerate the Security Journey

Get started with trial deployments of Microsoft's Threat Protection and SIEM technologies, which can be transitioned to production.

### ► Define Next Steps

Work together with an Interlink Security Consultant to define a list of next steps based on your needs, objectives, and results from the Security Workshop.

Security is a process of continuous improvement. If you are staying in place, that means you're falling behind. Learn how your organization can accelerate its security journey together with Microsoft.

# ENGAGEMENT DELIVERABLES

- ✓ Receive a documented security strategy for your teams and stakeholders.
- ✓ Knowledge on how to better understand, prioritize, and mitigate potential threats.
- ✓ Collaborate with our consultant to define a list of next steps based on your needs, objectives, and results from the Security Workshop.
- ✓ Have the tools you need to maximize your security journey.

## The Four Modules to this Engagement

### Threat Check

We utilize Microsoft 365 security products to gain visibility into threats to your Microsoft 365 cloud environment across email, identity, and data. This will help us better understand, prioritize, and mitigate potential vectors of cyberattacks.

### Discovery Session

This is a standalone module designed for the delivery team to learn about your organization, IT initiatives, security influencers, and priority/maturity against an array of security capabilities that Microsoft can help circumvent.

### Azure Sentinel

Leverage Azure Sentinel & Microsoft 365 security products to help gain an understanding and insight on active threats across on-premises & cloud workloads.

### Microsoft Threat Protection

This is a demonstration of how the security solutions work, including going through key scenarios of an attack kill chain to help you learn how to protect your environment.
