

ENGAGEMENT DELIVERABLES

- ✓ Receive a documented security strategy for your teams and stakeholders.
- ✓ Knowledge on how to better understand, prioritize, and mitigate potential threats.
- ✓ Collaborate with our consultant to define a list of next steps based on your needs, objectives, and results from the Security Workshop.
- ✓ Have the tools you need to maximize your security journey.

The Four Modules to this Engagement

Threat Check

We utilize Microsoft 365 security products to gain visibility into threats to your Microsoft 365 cloud environment across email, identity, and data. This will help us better understand, prioritize, and mitigate potential vectors of cyberattacks.

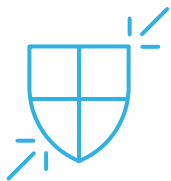

Discovery Session

This is a standalone module designed for the delivery team to learn about your organization, IT initiatives, security influencers, and priority/maturity against an array of security capabilities that Microsoft can help circumvent.

Azure Sentinel

Leverage Azure Sentinel & Microsoft 365 security products to help gain an understanding and insight on active threats across on-premises & cloud workloads.

Microsoft Threat Protection

This is a demonstration of how the security solutions work, including going through key scenarios of an attack kill chain to help you learn how to protect your environment.
