

# MANAGED SERVICES

## Control IT costs while leveraging our technical experts

Working hand in hand with you to develop solutions that best fit the needs of your business.

Rising costs and limited resources makes building trustworthy relationships critical in today's competitive markets. Partnering with Interlink Cloud Managed Services enables business leaders to control IT costs and leverage our very experienced technical experts so they can focus their attention and budgets with business strategy. Establishing a long-term partnership means you have a team devoted to assessing and managing your current and future IT needs, while keeping your budget in mind.

### Managed Security

Keeping Your Network Safe

You can rest assured that we are keeping your IT network safe from threats. Network hacks are on the rise and we're ready for it. We take IT security seriously that why we've included Webroot anti-virus and Malwarebytes anti-malware at no additional cost.

### Patch Management

Saving You Time

Windows patch management can be very time consuming and all too often business have limited resources to manage it effectively. With our Gold and Platinum plans, we manage and apply monthly Windows patches to your PCs and servers.

### Proactive Monitoring and Management

Assessing & Responding

We assess and respond to your IT network and solve the issues before they affect your business. Our U.S.- based team of engineers are industry leading experts in providing innovative solutions and delivering excellent customer service.

You shouldn't have to worry how much IT is going to chew up your budget, and every budget is different. That's why we have pricing models to fit any requirement, allowing you to focus on more value-added project that contribute to your business's success.

Your team knows your business best but their time is spent doing day-to-day tasks. Refocus them on the things that matter most and outsource the tasks that consume your IT departments time.
