SECURITY & COMPLIANCE
OPERATIONS MANAGEMENT SUITE

Easily monitor security threats within IT Operations

Modern Security Challenges

Today's IT Security and Operations teams are tasked with managing highly complex, hybrid-cloud, cross-platform systems that are increasingly vulnerable to a growing number of sophisticated cyberattacks.

With this, IT Operations teams have a requirement to identify security threats to their environment as soon as possible, in order to mitigate damages, as well as continue to cost effectively meet SLAs.

Solution

Security & Compliance within Operations Management Suite enables IT operations and security teams to more quickly and easily understand the overall security posture as well as detect and investigate security threats to their environment. Security & Compliance leverages Microsoft's own security data and analysis to perform more intelligent and effective threat detection, helping customers to mitigate damages and more easily comply with security audits.

Core Benefits

SIMPLE AND UNIFIED EXPERIENCE

Single pane of control to gain insight into security threats across multiple data sources such as Linux, Windows, AWS and Azure.

TRUSTED SOURCES OF INSIGHT

Cloud native, infrastructure-free, management as a service solution. Incomparable trusted and experienced sources of insight.

INTELLIGENT DETECTION AND INVESTIGATION

Leverage threat intelligence and behavior analysis to investigate and mitigate damage and simplify auditing.

KEY CAPABILITIES

✔ Cloud native, infrastructure-free, security management as a service

✔ Quick and easy security posture and threat detection

✔ Unified view for security related issues issues, all within the context of IT Operations in OMS

✔ Leverage Microsoft Security and third-party intelligence for more accurate threat detection and investigation

✔ Quickly and easily supply and query set for security audits and investigations

✔ Leverage best practice recommendations and security baselines

CLOUD ADVISORS

Threat Detection and Prevention Across Your Hybrid Cloud

SINGLE PLATFORM FOR SECURITY MANAGEMENT

Quickly and easily view the security posture of your entire environment within a single pane of glass, across your infrastructure including on-premises and cloud, and both Windows and Linux.

ACCESS ANYWHERE

Access your dashboard anywhere with customized rules and alerts to monitor your managed resources through your Windows, Android or iOS mobile. Operations Management Suite provides a unified and consistent user experience.

QUICK DATA COLLECTION

Save time and reduce effort in identifying security event and threat data to collect and analyze. Once you have the agents connected, the service will automatically select and collect necessary data to gain insight.

TRUSTED SOURCES OF SECURITY INTELLIGENCE

Correlate and analyze your data through a trusted and experienced source of intelligence, such as Microsoft's product group, support group, Microsoft IT, and Digital Crime Unit –as well as the most advanced third-party intelligence providers.

EFFICIENT DATA STORAGE

Regardless of the data increase, Operations Management Suite will provide bottomless compute and storage capacity, allowing you to cost-effectively monitor security events over longer periods for more accuracy, and supply data for critical security audits.

STREAMLINED AUDIT AND COMPLIANCE

Slash time and resources to comply with security audits –Operations Management Suite makes it easy to supply all of the critical security data in a comprehensive and searchable platform, as well as exportable formats for complete compliance.

IT'S TIME TO PROTECT YOUR ORGANIZATION AGAINST THREATS

Contact Interlink to start understanding the security posture of your environment - regardless of platform – with OMS on Azure.
