BETTER TOGETHER
Office 365 + DocuSign

W Word   **O** Outlook   **S** SharePoint
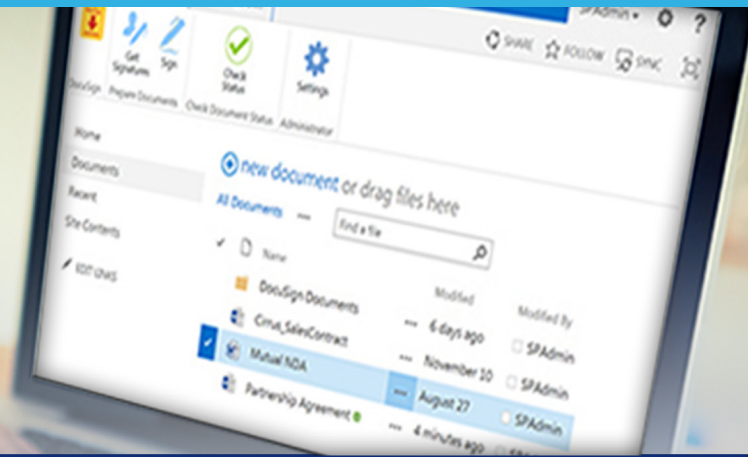

DIGITALLY SEND, SIGN & APPROVE DOCUMENTS FROM OFFICE 365

Many companies experience difficulty acquiring document signatures even though they spend significant resources on printing, scanning, faxing, mailing, and delivering physical documents. In today's mobile world, remote and distributed users need the ability to sign, send, and track documents. The combination of these items often lead companies to poor transaction management, which negatively impacts revenue and creates lost opportunity.

Keep your approval, contract and agreement processes 100% digital from start to finish by adding the DocuSign offering to your Office 365/SharePoint solutions.

DocuSign's eSignature software and Digital Transaction Management platform enable your organization to accelerate contracts, approvals and workflows, and reduce costs. You work directly within your Office 365 account to manage digital transactions and eSignatures anywhere, anytime, on any mobile device. Integrated with Office 365, DocuSign services can benefit organizations of every size, industry and geography.

ENHANCE PRODUCTIVITY

Streamline your workflow. Initiate signing directly from the Microsoft apps you know and use every day. No need to jump from app to app for every document.

SAVE TIME & MONEY

Conduct business securely and effectively from your favorite Microsoft products. No more printing, scanning, faxing, or mailing documents for signature.

DELIGHT YOUR CUSTOMERS

Get signatures and sign from anywhere, anytime, on any device. Signing is always FREE for you or your customers with DocuSign.
