"

The Power Platform offers low-code/no-code solutions that are easy to implement. It contains many actions and connectors, which makes importing/exporting data, and ways you report/save/work with the data streamlined and easier. The cost of ownership is low, and the tool is robust. It takes a practical approach to solutions and is easy to use and learn!"

— Healthcare Technical Project Manager

Adapt, grow, gain insight, and solve business problems faster and smarter with Microsoft's Power Platform.

The healthcare industry demands data to be readily available, secure, and compliant. From clinical data to operational and internal information, being able to effectively manage data — with no margin for error due to auditing and regulatory standards — can be challenging. The Power Platform offers scalable solutions to automate processes, view reports, and stay secure. This saves your organization time and mitigates risk.

USE CASES

Efficiency

Power Platform doesn't just manage the robust solutions, it can also create scheduled reminders for reporting efforts, data collection from collaborators, and tasks to ensure deadlines are met. With the high demand and flow of data in the healthcare industry, the Power Platform is the solution to utilize and stay ahead of data and not drown in it.

Usability

With Power BI, you have visual representations of data at a glance with real-time statistics. You can understand real implications and make informed business decisions from discovered insights. The Power Platform is a one-stop solution that is customizable for your specific organizational needs and processes.

Save Time

Routinely, there is a need to update Excel documents, send PDFs to suppliers, and manually approve processes. This can be loathsome, time-consuming, and can sit stalled waiting on approvals. With Power Platform, it's easy to automate the routine creation of PDFs and documentation from Microsoft Office and send it through an approval process. Approvals are handled in actionable emails (depending on your Outlook version) and can be approved "on the go," meaning on any device where you can access your email. This means quicker turnaround times to get those urgent changes approved and communicated out to your internal team and external partners.
Learn how Interlink's experts can help your organization leverage the Power Platform today!

Interlink's Power Platform offering can transform the way your business operates. From setting up governance and use cases to deep application development, we will work with you to implement and optimize this powerful set of tools in your specific environment. **Contact us** today!

The 'Power Platform is a collection of four Microsoft products: **Power Automate, Power Apps, Power BI, and Power Virtual Agents**. You can connect the Power Platform to Office 365, Dynamics 365, Azure, and hundreds of other apps to build end-to-end business solutions and gain insight into your organization's data.

Power Apps

Quickly build low-code + mobile-friendly apps that connect to your data sources or extend functionality, which empowers your organization to solve business challenges and streamline processes.

Microsoft's Power Apps allows everyone to build and share low-code applications. Your organization can start building and launching apps through a simple platform with prebuilt templates as well. Connect your data sources through Power Apps to create solutions that scale to meet your organization's needs.

Power BI

Experience your data – your way. Unify data from many sources to create interactive, immersive dashboards and reports that provide actionable insights and drive business results.

Microsoft's Power BI is an interactive business analytics tool that provides rich visualizations and self-service business intelligence capability. It allows any user to build powerful reports and dashboards to provide valuable insights into their data.

Power Automate

Automate workflows directly in your apps with a no-code approach that connects to hundreds of popular apps and services.

Save your organization time and boost productivity by streamlining repetitive tasks and paperless processes. Refocus your attention on what is important by leveraging the intelligent workflows of Power Automate.

Power Virtual Agents

Easily build chatbots to engage conversationally with your customers and employees – no coding required.

Quickly create AI-powered chatbots that can resolve common issues and answer questions around the clock — saving your team time and empowering your organization to work more productively.
