

How to protect your business in a mobile world

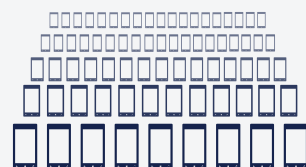

Is your data safe?

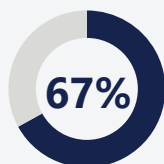

8 of 10

employees use their mobile device for both work and personal¹

70 million

smartphones are lost each year²

of businesses had a data breach from a mobile device³

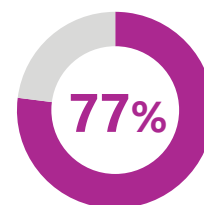

Only 16%

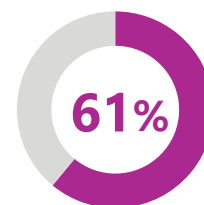

of businesses are prepared for mobility security threats¹

Mobile technology promises big rewards

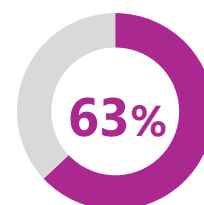

In a study of how mobility benefits businesses¹...

say it helps drive business growth

say it boosts productivity

say it increases efficiency

53 seconds

A laptop is stolen nearly every minute⁴

Protect all your mobile devices wherever they go

1 While traveling on a sales trip, an employee loses their laptop at the airport

2 Back at headquarters, IT is able to remotely delete sensitive company data from the lost device

3 As a result, the business is saved from potential data breach, avoiding major costs and reputation damage

...all made possible with Enterprise Mobility + Security
