USE CASE:

eDiscovery & Compliance

Identify, preserve, and export data for regulatory compliance — with better speed and precision.

Granular Restoration

Easily locate active or deleted data, rapidly recover from an attack, and restore valuable data across Office 365 applications.

Security

With stringent security protocols, zero-trust access controls, and virtual air-gapped backup copies, Metallic provides a multi-layered approach to security and protecting your data.

Exclaimer: Cloud Signature Editor

Quickly and easily creating the Office 365 signature design you want without having to edit raw HTML code with the most advanced signature editor in the world. Exclaimer enables organizations to centrally design and control email signatures across an entire company — standardizing your marketing and keeping your brand protected and consistent across every email, every time.

Exclaimer is designed for anyone with any level of technical ability. Create the perfect signature for your organization, or internal departments, from scratch or start with a template with an easy-to-use no-code interface. Exclaimer integrates with your organization's Office 365 directory, pulling information fields that you want to communicate.

USE CASE:

Standardization

Exclaimer consolidates your organization's marketing approach. Easily customize signatures for different departments, individuals, and replies or forwards to ensure each email is on brand and standardized.

Compliance

Ensure 100% compliance with email disclaimer laws throughout the world.

Engagement

Market to drive engagement through a unified approach. Add promotional banners for events, company news, or new content to drive engagement.

DocuSign: eSignature DocuSign®

DocuSign eSignature enables organizations to send and receive agreements, contracts, and approvals in a simple and seamless way, which saves time and money by moving business forward and streamlining processes.

Organize contractual documents and utilize workflows out of SharePoint to transform your organization's processes. With integrations across Microsoft 365 and Dynamics 365, DocuSign is everywhere you want it to be within the world of Microsoft applications. Easily prepare and send documents for e-signature by leveraging Microsoft applications like Microsoft Word, SharePoint, or Outlook.

Save Time

Use Power Automate to streamline processes between DocuSign and your Microsoft applications. Automate forms/process with workflows, i.e. signing a waiver before a customer can utilize a service.

Productivity

Integrate with Microsoft Teams to drive additional productivity by quickly sending agreements like onboarding documents or sales contracts.

Security

DocuSign includes an electronic record that serves as an audit trail and proof of transaction. It can help you meet stringent security standards using the strongest data encryption technologies available.

ClipTraining: eLearning

ClipTraining is a self-service Microsoft 365 eLearning solution that saves time and money by keeping your organization's knowledge workers up to speed and productive through on-demand training.

With a Cloud-based learning platform, users can improve their skills from anywhere. All lessons have been created by industry experts and Microsoft MVPs to help learners retain more and apply their new skills immediately.

USE CASE:

Drive Teams Adoption

All training videos are available from inside a native Teams application to maintain user focus without having to open new windows.

Boost Productivity

Improve your end user's skills and knowledge base with the software they use every day.

Reduce Helpdesk Calls

Helpdesk can automate the distribution of training, thus reducing calls and solving problems efficiently. With full-text index searching, users can also quickly find the training video they need to accomplish the task at hand on their own.
