IS IT TIME TO UPGRADE FROM SQL SERVER 2005?

Experience the Benefits of SQL Server 2014

SUPPORT FOR SQL SERVER 2005 HAS COME TO AN END.
What this means...

END OF SUPPORT
Can fail to meet compliance standards

NO ACCESS TO CRITICAL SECURITY UPGRADES
Potential business interruptions

MAINTENANCE OF LEGACY SYSTEMS
Higher maintenance costs

NOW IS A GOOD TIME TO UPGRADE TO...
SQL Server 2014
BENEFIT FROM THE **DRAMATIC PERFORMANCE GAINS**, **HIGHER AVAILABILITY**, **SCALABILITY**, AND **RICH BI CAPABILITIES** IT HAS TO OFFER.

✔ Modernize your data platform

✔ Maintain security and compliance

✔ Achieve mission critical performance

WHY YOUR IT DEPARTMENT WILL LOVE SQL SERVER 2014

Security
Supported, compliant database platform—least vulnerable 6 years in a row[3]

Scalability
Scalable across compute, networking and storage with Windows Server 2012 R2 and up to 640 logical processors

ROI
Payback in 9.5 months[1]

Support
Includes security patching and maintenance updates

Improved Application Performance
Up to 30x faster transactions with in-memory OLTP

IT Resource Productivity
20% improvement[4]

In-Memory Analytics
Process millions of rows in seconds

Data Access to the Right People
Up to 100x query performance gains with in-memory ColumnStore

Speed
Runs up to 13x faster than SQL Server 2005[2]

Microsoft SQL Server 2014

FEATURES OF SQL SERVER 2014

MINIMIZED DOWNTIME
AlwaysOn Availability Groups, now with up to 8 readable secondaries.

EASY ACCESS TO DATA, BIG & SMALL
Get insights on any and all of your data and make more informed decisions.

POWERFUL INSIGHTS WITH FAMILIAR TOOLS
